Pervasive Computing Term Project
Spring 2005

Description:
Project/Paper may be done in individually. Projects will be approved for research oriented projects. Groups larger than two are not permitted. Your class project should require you to go beyond what we have done in class.

   Students are welcome to do projects/papers in every topic, such as surveys and implementations as well; as long as it is related to pervasive computing. If in doubt, please ask me.

Important Timeline:

   April 20  Choose a project topic. At this time, you should inform me about your project topic.

   May 4    Submit a two page abstract of your project. You will also give a ten minute presentation in class. Each will prepare the the abstract presentation and write a 1-2 page description about your intended accomplishment.

   May 23   Submit progress report.

   Jun 6    You will also give a presentation in class describing your project.

   Jun 22   Final report due. It is limited to a fifteen-page maximum including all text and figures.

FAQS:
No FAQS yet! Any clarifications/corrections of the original assignment will be posted here.
